Defence and public safety agents on Katonic

35 agents across nine areas

A defence or public safety organisation's office work runs through its logistics, maintenance, records, procurement and personnel systems and the orders, policies and files around them. Every agent reaches them in one of four ways, all through the same tool gateway and the same approval rules:

	HOW EACH AGENT CONNECTS
01	**A file the user uploads** in the conversation: an officer's notes, a supplier's bid, a maintenance form, a disclosure request.
02	**A knowledge source.** Policies, doctrine, standing orders, technical publications, procurement rules and training material are indexed in the Knowledge Engine, with each reader's permissions and markings kept.
03	**An imported API.** The organisation gives Katonic the description of an API it already runs, and the operations it chooses become tools. This is the route to systems of record: stores and spares, work orders, contracts, personnel records, the records index.
04	**An MCP server from the catalogue,** deployed inside the organisation's own cluster. This is the route to the data warehouse and reporting databases. On a network with no outside connection, nothing reaches beyond it.

System names are left out on purpose. The organisation supplies the address and the sign-in. Nothing here is a tested integration with a named product.

THE NINE AREAS

01	Policy and doctrine	2
02	Logistics and sustainment	2
03	Maintenance and equipment records	3
04	Procurement and contracts	3
05	Records and disclosure	4
06	Reports and case files	4
07	Training and readiness	5
08	Border and customs paperwork	5
09	People and finance	6

AREA 01

Policy and doctrine

AGENT	WHAT IT DOES	READS FROM	WHERE IT STOPS FOR A PERSON
Policy and Doctrine Q&A Agent	Answers a staff member's question from the organisation's own policies, doctrine and standing orders, cites the paragraph, and says when they are silent	Policies, doctrine and standing orders as a knowledge source	It informs. Interpretation and any exception go to the policy owner
Briefing Note Agent	Drafts a briefing note from the papers the officer supplies, in the organisation's format, with each statement tied to its source	The papers as uploaded files; the format as a knowledge source	The officer edits, signs and submits the note
Policy Change Impact Agent	Summarises a new law, directive or order and lists the internal policies and procedures it touches	The document as an uploaded file; internal policies as a knowledge source	The policy owner decides the response
Correspondence Drafting Agent	Drafts the reply to a letter from the public, a member of parliament or another body, from the file and the agreed lines	The letter and the file as uploaded files; agreed lines as a knowledge source	An official approves and sends every reply

AREA 02

Logistics and sustainment

AGENT	WHAT IT DOES	READS FROM	WHERE IT STOPS FOR A PERSON
Spares and Stores Check Agent	Checks the parts and stores a planned task needs against stock and open orders, and lists what is short	Planned tasks, stock and orders through an imported API	The logistics officer orders or reschedules. The agent places no order
Supply Request Check Agent	Checks a supply or movement request for missing details and for conflict with the allowances and rules that apply	The request as an uploaded file or through an imported API; the rules as a knowledge source	The approving officer authorises or returns the request
Delivery Discrepancy Agent	Sets a delivery note against the order and what was counted in, and drafts the discrepancy report	The delivery note as an uploaded file; the order through an imported API	Stores staff check the count. The contracts team raises the claim
Sustainment Report Agent	Prepares the periodic sustainment report: stock, availability, demands and delays against plan, with the figures	A reporting database, read only	The logistics lead draws the conclusions

AREA 03

Maintenance and equipment records

AGENT	WHAT IT DOES	READS FROM	WHERE IT STOPS FOR A PERSON
Technical Publication Q&A Agent	Answers a technician's question from the technical publications and past work records, cites the page, and says when neither covers it	Technical publications as a knowledge source; work records through an imported API	It informs. The technician and the authorising engineer decide the work
Maintenance Record Check Agent	Reads a completed maintenance record and lists missing entries, signatures and values outside the limits the publication sets	The record as an uploaded file; the publication as a knowledge source	The authorising engineer accepts or rejects the record
Work Order Drafting Agent	Turns a technician's notes into a complete work order: equipment, fault, work done, parts, time	The notes as an uploaded file; the equipment list through an imported API	The technician or the planner submits it
Equipment Availability Report Agent	Prepares the availability report for a fleet or a class of equipment, with the causes recorded for each item not available	A reporting database, read only	The fleet manager draws the conclusions

AREA 04

Procurement and contracts

AGENT	WHAT IT DOES	READS FROM	WHERE IT STOPS FOR A PERSON
Tender Compliance Check Agent	Checks each bid against the tender's mandatory requirements and lists what is missing, before evaluation begins	The bids as uploaded files; the tender as a knowledge source	The procurement panel evaluates and decides. The agent scores no bid
Requirement Drafting Agent	Drafts a statement of requirement from the user's notes and past requirements, in the organisation's format	The notes as an uploaded file; past requirements as a knowledge source	The requirement owner approves it
Contract Obligations Summary Agent	Lists a contract's obligations, deliverables, milestones and notice periods, each with the clause	The contract as an uploaded file	The contract manager checks the summary against the contract
Supplier Screening Review Agent	Sets out the evidence for and against each possible match when a supplier is checked against sanctions and exclusion lists	Screening results through an imported API or as an uploaded file	The compliance officer clears or escalates every match. The agent screens companies, not individuals under investigation

AREA 05

Records and disclosure

AGENT	WHAT IT DOES	READS FROM	WHERE IT STOPS FOR A PERSON
Disclosure Request Preparation Agent	Gathers the records a freedom of information or subject access request covers, and lists the passages that may fall under an exemption, with the exemption	The records index through an imported API; the request as an uploaded file; the guidance as a knowledge source	The disclosure officer decides every exemption and releases the response
Redaction Preparation Agent	Marks the passages in a document that the organisation's redaction rules cover, with the rule behind each	The document as an uploaded file; the rules as a knowledge source	A trained officer checks every mark and applies the redaction
Records Retention Check Agent	Lists the records due for review or disposal under the retention schedule, with the schedule entry	The records index through an imported API; the schedule as a knowledge source	The records manager decides what is kept or destroyed

AREA 06

Reports and case files

AGENT	WHAT IT DOES	READS FROM	WHERE IT STOPS FOR A PERSON
Report Drafting Agent	Turns an officer's own notes into a report in the organisation's format, marks the draft as written with an agent, and keeps the notes beside it	The officer's notes as an uploaded file; the format as a knowledge source	The officer reads, corrects and signs the report, and owns every word. The agent adds no fact the notes do not hold
Interview Record Summary Agent	Summarises a transcript of a recorded interview, with each point tied to its place in the recording	The transcript as an uploaded file	The officer checks the summary against the recording
Case File Completeness Check Agent	Checks a case file against the list of what the file standard requires and lists what is missing	The file index through an imported API or as uploaded files; the standard as a knowledge source	The supervising officer decides whether the file goes forward
After-Action Report Agent	Assembles the record of an exercise or an incident into the after-action format: timeline, decisions recorded, issues raised, with the source of each	Logs and returns as uploaded files; the format as a knowledge source	The reviewing officer draws the lessons and signs the report

AREA 07

Training and readiness

AGENT	WHAT IT DOES	READS FROM	WHERE IT STOPS FOR A PERSON
Training Content Agent	Drafts a lesson note or a quiz from a procedure or a publication, in the organisation's format	The procedure as a knowledge source	The training lead approves the content. The agent assesses no one
Training Record Check Agent	Lists the qualifications and currencies due or expired for a unit against the requirement, with the record behind each	Training records through an imported API; the requirement as a knowledge source	The unit training officer decides what is booked
Exercise Planning Pack Agent	Assembles the planning pack for an exercise from the templates, the lessons of past exercises and the orders that apply	Past reports and templates as a knowledge source	The exercise director approves the plan
Inspection Preparation Agent	Sets a unit's records against an inspection's checklist and lists the items with no evidence	Unit records as a knowledge source; the checklist as an uploaded file	The commanding officer decides what to fix before the inspection

AREA 08

Border and customs paperwork

AGENT	WHAT IT DOES	READS FROM	WHERE IT STOPS FOR A PERSON
Customs Guidance Q&A Agent	Answers an officer's question from the customs and border rules the agency holds, cites the provision, and says when they are silent	Customs and border guidance as a knowledge source	It informs. The officer decides
Declaration Document Check Agent	Sets a goods declaration beside its commercial documents and lists every difference and missing item	The declaration through an imported API; the documents as uploaded files	The customs officer decides what happens to the consignment. The agent decides nothing about a traveller or a person
Tariff Classification Support Agent	Sets a product description against the tariff and past rulings, and gives the reasons for and against each candidate code	The description as an uploaded file; the tariff and rulings as a knowledge source	The classification officer decides the code
Trader Correspondence Agent	Drafts the reply to a trader's or a carrier's query from the file and the published guidance	The query as a ticket; guidance as a knowledge source	An officer approves and sends every reply

AREA 09

People and finance

AGENT	WHAT IT DOES	READS FROM	WHERE IT STOPS FOR A PERSON
Personnel Policy Q&A Agent	Answers a staff member's question about terms of service, allowances and leave from the organisation's own regulations, with the paragraph cited	Personnel regulations as a knowledge source	It informs. Any exception goes to the personnel office
Allowance Claim Check Agent	Checks a claim for allowances or expenses against the regulations and lists each item that does not meet them	The claim as an uploaded file; the regulations as a knowledge source	The approving officer authorises or returns the claim
Invoice Matching Agent	Matches a supplier invoice to the order and the goods receipt, and lists every difference	The invoice as an uploaded file; the order and receipt through an imported API	The finance office approves every payment
Role Description Drafting Agent	Drafts or updates a role description from the establishment record and the organisation's template	The record through an imported API; the template as a knowledge source	The line manager and the personnel office approve it. The agent assesses and ranks no one

WHAT EVERY AGENT HAS IN COMMON

01 **It runs on the organisation's own infrastructure,** with a model the organisation serves, on a network with no outside connection where that is required. Nothing leaves it.

02 **Every tool call passes the organisation's policy.** A policy can allow a tool, record its use, hold it for a person's approval, or block it, for the whole organisation or for one unit.

03 **A tool that changes something waits for approval** unless the organisation has decided otherwise for that tool. That is how no record, order, reply or release goes out unapproved.

04 **No agent decides about a person,** and none identifies, profiles or scores one. It prepares paperwork, and a named officer or official decides.

05 **The agent acts as the person using it.** It reads what that person is cleared to read, and no more. Where the organisation's API checks the caller, Katonic passes the signed-in user's identity.

06 **Every call is recorded,** with who asked, which tool, and what was decided, and an agent, a tool or a whole server can be switched off at once.

WHERE TO START

Pick work where reading is slow, the decision stays with a person, and no operation waits on the agent.

THREE PLACES THAT FIT

Policy and Doctrine Q&A

Staff ask what the organisation's own policies and orders say and get the answer with the paragraph cited. No system of record is touched, so it can run on day one.

Maintenance Record Check

The agent lists missing entries and signatures on a completed record. The authorising engineer accepts or rejects it.

Disclosure Request Preparation

The agent gathers the records and lists possible exemptions. The disclosure officer decides and releases.

One unit, one process, unclassified or invented data first. Then beside the manual process, measured against it.

Each one prepares the work. A named officer decides.

About Katonic AI

Katonic AI builds the platform that organisations use to build, run and govern AI agents on their own infrastructure: in their own data centre, in a private or sovereign cloud, or with no connection to the internet at all. The platform is in production with governments, banks, telecom operators and utilities. Katonic is certified to ISO 27001.
